

# FRAMING AND HANGING STANDARDS

*Create. Appreciate. Participate.*

*Artist Agreement Exhibit B*

All frames and mats must be in good condition, free of dirt, broken ornaments and obvious surface damage.  
 All frames must be appropriately sized to support the weight of the art on the wall.  
 All frames must be equipped with straphangers and wire, located within the top 1/3 of the frame.  
 Screw eyes and sawtooth hangers are not permitted.

When measuring artwork for hanging, measure from the outside edges of the frame as shown below.

All frames must be well constructed with nail holes filled and miter joints tightly joined.

Glazed surfaces (glass or acrylic) are required if framing works on paper. Glazing should be clean and free of scuffs and scratches. Metal frames must be secure to hold glazing.

If you need to attached D-rings to your frame, the following website can guide you through the process:
